Acknowledgments

This work was supported by the U. S. Department of Transportation (Assistant Secretary for Transportation Policy, Federal Highway Administration, Federal Transit Administration), the U. S. Environmental Protection Agency, and the U. S. Department of Energy as part of the Travel Model Improvement Program.

The North Central Texas Council of Governments (NCTCOG) provided network and trip table data for TRANSIMS research. We wish to thank them for their cooperation and participation during the development of the TRANSIMS capabilities and for their support of TRANSIMS within the transportation community.

The Dallas Case Study network and trip table data were derived from travel model runs prepared by the North Central Texas Council of Governments (NCTCOG) for other study purposes. In order to prepare datasets suitable for TRANSIMS, additional modifications were made by both NCTCOG and Los Alamos National Laboratory. Some data was synthesized for TRANSIMS testing, with the output results useful for research purposes. For information about the input data, contact Ken Cervenka of NCTCOG, 616 Six Flags Drive, Suite 200, Arlington, Texas 76005 (email = kcervenka@nctcog.dst.tx.us; phone = 817/695-9240).
